

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. PREFATORY.

The present volume concludes the reprint of Provincial Assessments and of taxables during the Revolutionary period. The most valuable portion of these papers consists of the census of the inhabitants of certain counties taken during the year 1783 or 1784. The question may be asked, of what use are such papers, and the answer may be in somewhat the same tone, of what use are any papers? Since the commencement of their publication, the Editor has received a large number of letters from prominent persons throughout the State, expressing their satisfaction at the publication of these assessment lists. They show in numerous instances the dates when the early settlers came into their respective neighborhoods, and when these persons passed from off the stage of action, or removed into other localities. In all cases, it confirms the settlement of the early inhabitants and it is somewhat unfortunate that all of the original assessment lists are not in the possession of the State. Fire and flood, with other causes, have lost to us many of these valuable papers. In the publication of these the Editor has confined himself strictly to the spelling of surnames as in the original papers, and a word of explanation is necessary lest those in search of information impute the many gross errors to the carelessness of the printer or the copyist. As will be seen members of the same family on the same assessment list may have their names spelled differently, and in no two years of scarcely any assessment list is there a uniformity. It was not the province of the Editor to make any corrections for it is a lamentable fact that even to-day, there are many individuals who do not know how to write their own names accurately.

To the historian, biographer and genealogist these records are and will be of very great interest. In numerous instances they have already furnished clues as to family connection as well as to dates of actual settlement. How far-reaching these benefits may be will better appear as the years roll on. There is no doubt whatever of their inestimable value, although appearing upon the surface as a record of cold facts.
